REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the references of record neither reveal nor render obvious the recited combination, including detection of a runlength polarity at a first predetermined position in a runlength-limited, hereafter RLL, code sequence, and setting a parameter reflecting a degree of freedom in the RLL code based on the detected polarity in order to obtain a polarity for a second predetermined position, corresponding to a binary value of a secondary information signal.

U.S. Patent 6,285,302 to McClellan discloses a RLL code having inserted uncoded bits. U.S. Patent 6,188,335 to Roth et al provides RLL codes in order to make lower performance recording systems compatible with standard readers. U.S. Patent 6,002,718 to Roth generates RLL codes for DC control. U.S. Patent 5,774,078 to Tanaka et al shows single merging bit DC-suppressed RLL coding.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
